PROFESSIONAL SUMMARY

Technical Project Manager with 4 years of experience delivering software products alongside cross-functional engineering, design, and QA teams. Manages multiple concurrent technical projects end to end, covering requirements, roadmap, sprint planning, dependency and risk tracking, QA gates, and stakeholder approved release across web, mobile, and AI products. Leads and mentors cross-functional teams, conducts client meetings, and ensures timely delivery and quality execution. Builds scalable systems, SOPs, and workflows that improve operational efficiency, and communicates clearly with strong English across clients and stakeholders. Hands-on with ClickUp, Jira, and similar project management tools. MS in Project Management.

EXPERIENCE

Algorithm

Remote | August 2024 to May 2026

Project Manager

- Stats:** Led 2 product launches and managed 10+ projects, delivering 48+ Agile sprints end-to-end while leading cross-functional teams (engineering, design, QA, leadership) and ensuring timely delivery and quality execution.
- Managed multiple technical projects simultaneously; conducted client meetings and stakeholder communication, tracked action items to closure, and oversaw priorities, risks, and QA to keep delivery on schedule.
- Built scalable workflows and automations (n8n, Zapier, Google Apps Script) alongside Jira and ClickUp boards and reports to improve operational efficiency across projects.
- Delivered across Agile, Waterfall, and hybrid approaches, using structured, repeatable processes for both fixed-scope client work and iterative product work.

AI Workforce & Field Operations Platform

Project Manager | Canadian Client

- Stats:** Delivered MVP in 2 months across 8 sprints within a 6-week cycle.
- Led web and mobile delivery from concept to launch, aligning the team and client leadership with business goals.
- Scoped an AI assistant answering from the client's own training material, a structured training module, field job tracking, and integration with their existing scheduling system.
- Structured the roadmap, sprint plan, and milestone approvals while managing client expectations and stakeholder communication.

Digital Healthcare Application

Project Manager | Canadian Client

- Stats:** Delivered MVP readiness in 4 months across 15 sprints and 2 release cycles.
- Led and coordinated a cross-functional team across engineering, design, and technical leadership on a patient mobile app and clinician web dashboard.
- Scoped onboarding and consent flows, appointment management, third party payment integration, and secure patient to clinician messaging; cleared app store review as a regulated health product.
- Ran ceremonies, backlog prioritization, quality validation, and client status reporting to ensure timely, quality delivery.

AI & Digital Platforms

Project Manager | Malaysian Client

- Stats:** Managed 4 concurrent projects owning priorities, delivery, dependencies, and stakeholder alignment on a weekly sprint cadence.
- Delivered an AI teaching platform, an on premise AI workspace, a public data collection platform with AI image validation, and a transcription tool from requirements and UI/UX through QA and stakeholder-approved release.
- Wrote sprint plans with task breakdowns, effort sizing, priority tiers, and written acceptance criteria; ran root cause analysis on production defects and tracked blocking decisions to named owners.

Cloud School-Management SaaS

Company Product | Project Manager + UI/UX + QA

- Stats:** Delivered across 25 sprints from concept to deployment.
- Led delivery of a cloud-based SaaS platform end to end: roadmap, milestone releases, live customer onboarding, and subscription revenue launch.
- Phased delivery by dependency, student records, then admin and finance, then teaching workflows, and owned UI/UX and QA alongside product.

Additional Contributions

- Supported 10+ additional initiatives across edtech, health tech, and web, owning planning, QA/UAT, DFDs, and documentation across phases.
- Contributed QA across five further client products in digital health, field operations, national science, and AI platforms, plus pitch decks and project documentation.

K2X Tech

On-Site | June 2022 to January 2024

HR Business Partner (Team Leadership & Systems)

July 2022 to January 2024

- Stats:** Scaled the organization from 8 to 45+ employees, managed 50+ hires, led 2 biannual review cycles, and facilitated 18+ monthly town halls.
- Led team development, onboarding, and mentoring company-wide, coordinating cross-functional stakeholders across teams and finance.
- Built scalable systems and SOPs from scratch: business processes, policies, and performance-review frameworks, authoring the employee handbook, leave policies, and lifecycle templates to improve operational efficiency.

- Managed end-to-end recruitment programs from JD creation and sourcing to interviews, offers, and onboarding.
- Contributed to company brand identity, including brand guidelines, tone of voice, and communication consistency.

Technical Content Writer June 2022 to August 2022

- **Stats:** Improved documentation consistency and efficiency by 30%; delivered documentation across SaaS, web, and mobile client products.
- Coordinated with product, design, and marketing teams to validate accuracy and maintain brand and workflow consistency.

 EDUCATION

MS Project Management, Institute of Management Sciences 2023 to 2025 | CGPA 3.67

Coursework: Project planning & scheduling, risk & quality management, cost & procurement management, and Agile & Waterfall methodologies.

Research: Impact of English Language Proficiency on Media Choice within software development teams.

BS Information Technology, University of Agriculture Sciences 2018 to 2022 | CGPA 3.64

Final Year Project: Developed an open source vehicle booking platform using React.js, Node.js, and MySQL.

 SKILLS & TOOLS

Technical Project & Delivery Management: Managing multiple technical projects simultaneously (5 to 10+); requirements, epics, user stories & acceptance criteria; project planning, scheduling & roadmapping; timelines, milestones & timely delivery; backlog, prioritization & quality execution; Agile (Scrum, Kanban), Waterfall & hybrid delivery; risk, issue & dependency tracking; QA gates, UAT & release management.

Technical Delivery Practice: Translating client problems into epics and written acceptance criteria; managing third party and API integration dependencies; root cause analysis on production defects with ordered fixes; releases across app store review, web, and on premise environments.

Product & Technical Domains: Web, mobile & SaaS platform delivery; AI products including assistants, retrieval, and image validation; third party API & payment integrations; regulated health product release.

Leadership & Team Management: Leading & mentoring cross-functional teams; onboarding, team development & performance reviews; client meetings & stakeholder communication; cross-functional coordination & accountability.

Systems, SOPs & Efficiency: Scalable systems, SOPs & standard workflows; process optimization & operational efficiency; standardized documentation, dashboards & reporting; change management & continuous improvement.

Project & Delivery Tools: ClickUp & Jira (projects, tasks, sprints & tracking); Linear & Notion (workflows, docs & coordination); GitHub Projects & MS Project (delivery & timeline planning); comfortable adopting Asana, Trello, Monday.com & similar.

Automation & Collaboration: n8n, Zapier & Google Apps Script for workflow automation; automated meeting recaps, reminders & status updates; Slack, Microsoft Teams, Zoom & Google Workspace; Miro & Excalidraw for planning and coordination.

Certifications: Google Project Management Certificate; IBM Product Management track; Agile with Atlassian Jira; ClickUp Expert; Amal Career-Prep Fellowship.

Communication & Languages: Executive updates, meeting records & stakeholder reporting; English (full professional proficiency); Pashto, Urdu, and Persian.

 LEADERSHIP & TEAM MANAGEMENT

- Led and mentored cross-functional teams across engineering, design, QA, and operations.
- Grew a team from 8 to 45+, owning onboarding, team development, and performance-review frameworks.
- Balanced multiple concurrent projects, aligning priorities and people across them.
- Conducted client meetings and managed stakeholder communication for multiple projects.
- Coordinated cross-functional teams to hit deadlines while maintaining quality and morale.

 SYSTEMS, SOPs & OPERATIONAL EFFICIENCY

- Built scalable systems and SOPs from scratch, including handbooks, policies, and process frameworks.
- Standardized project workflows, documentation, and reporting for consistent, repeatable delivery.
- Automated repetitive workflows (n8n, Zapier, Google Apps Script) to reduce manual effort.
- Set up boards, dashboards, and status reporting to give stakeholders clear visibility.
- Drove process optimization and operational efficiency across teams and clients.
